

# MULTIPLE-COMPRESSOR UNIT MODULE FOR INSTALLATIONS USING NATURAL CO<sub>2</sub> REFRIGERANT.

## ➤ IDEAL FOR

- Refrigeration systems operating at low-medium-high temperatures or a combination of all three
- An operating range of 30 to 225 tons

## ➤ OPTIONS

- Total recovery of compressor heat using a glycol loop
- Preheated water tank
- Computerized data processing and control management

## ➤ THE LMP ADVANTAGE

- Minimal operating costs
- Heat recovery using dedicated compressors (patented technology)
- Compressor lubrication management (patented technology)
- Parameters can be managed remotely
- Minimal maintenance and servicing required
- Zero greenhouse gas emissions
