THE GROUP

The Industrial Group B&M of Turin, showing for many years a profit on the market as a firm well oriented to manufacturing and trading in components for refrigeration and air conditioning, that boasts the presence of important Companies as:

- B&M Srl, located in Leini (Torino)
- B&M France, based in Nice - France
- IRD Iniziative Srl, located in Cordenons (Pordenone) - Manufacturing Dept.
- REC Srl, located in Gonars (Udine) - Manufacturing Dept.

THE COMPANY

B&M can pride itself for years to be known as a structure of reference in air conditioning and refrigeration sector. B&M srl, located in Turin - North Italy, projects and produces accessories in copper, specially made for VRF air conditioners' refrigerant piping systems (multi split with Variable Refrigerant Flow).

With its experience and technological toolery capacity, B&M is able to produce specific pipe systems to measure, in different forms, in copper.

We warrant quality of our products, conditioned with safety catch for each piece, thanks to our experience of management in the chilling sector.

The Manufacture Company

IRD Iniziative S.r.l. Firm, owner of Refrigera Linea del freddo Trade Mark, has been dealing in Industrial Refrigeration for over 15 years. Since December 1st, 2003, IRD Iniziative S.r.l. has started working following ISO9001 / 2000 standards in design, manufacturing and trading with ball valves and refrigeration components.

This guarantees, that all products are manufactured by skilled workmen who use first class, suitable materials. Furthermore, our products have been subjected to inner quality tests - in accordance with 97/23/EC (PE Directive) - and have passed them all.

On the 24th of July '08 has signed an important joint-partnership with the Industrial **Group B & M of Turin**, showing for many years a profit on the market as a firm well oriented to manufacturing and trading in components for refrigeration and air conditioning, that boasts the presence of important Companies as:

B&M Srl

B&M France

REC Srl

The new partner, that was already a customer of the company, will promote the strengthening of the economies of scale with regard to the integration of functions in common, will provide to reduce time in decision-making to gain a

possible addition into the products range, and will allow the group to expand its market sales to the countries of Eastern Europe, where it has significant presences.

Mr. Agatino Maurizio Papa, owner of B&M Group, has appointed as General Manager of the company IRD Iniziative.

Ing. Piero Ragusini has appointed as Head of Commercial and Technical Section of IRD. We wish to confirm that this agreement will provide just benefits for the customers that already know us, which now can count on a stronger group against competition, and for the new customers, which can evaluate by now the new and enlarged products range.

The wholesale Trading

With his Manufacturing Site located in Cordenons (PN), thanks to the great flexibility typical of a small Company, IRD Iniziative S.r.l. is able to meet all special customer needs and also is the best partner that your purchasing department can have, because is able to perform many of the customer's acquisition and inventory management activities, with a business relationship that gives you many advantages: savings on acquisition costs, more time devoted to your core business, the knowledge

of someone familiar with engineering needs: in general improving efficiency and profit margin.

As customer, thanks to Refrigera help, you'll be able to structure your purchasing department slim and efficiently, which means no more than two employees and, most of all, no need for specific education or field experience in technical buy.

And you will see that the higher your purchasing requirements, the better the results!

Our Stand at MCE Exhibition - Milan - Italy 2008

New Ball Valve "Zero"

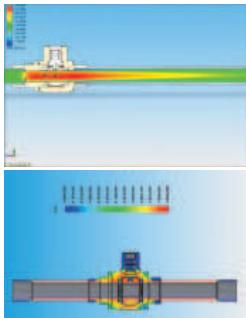

"Thus was born the project A-Zero, a valve in which simplicity is its winning weapon"

News

In order to reconcile the demand of high quality and low price, thanks to close cooperation with its suppliers, IRD has developed a new valve ball extremely simple, but extremely performing. Have been carried out a series of computer-simulated fluid dynamics experiments in order to achieve the maximum improvement of the

parameters to obtain high efflux-coefficients and very small dimensions. Thus was born the project A-Zero, a valve in which simplicity is its winning weapon: the extreme weight reduction has not compromised the reliability or the seal-closing and the possibility of adjusting opening through the same valve-cap,

allows easy installation and management. The market for safety valves expected for the introduction of exchange devices that simplify the periodic inspection and maintenance on the security twin-valves: now IRD produces them by itself in five types to encounter the most widespread diameters.

New Ball Valve "Zero" Testing Results

Special Assemblies

IRD has been sought for meet the demand of customers, increasingly oriented to reduce the time and the effort for manoeuvres and maintenance of the facilities, through remote controls: the numerous

Actuated Ball Valve

requests for automation by electric actuators, forcing IRD to devote to actuated - 2 way, 3 way - valves an entire section of the catalogue.

Other successes

During the whole year 2007, it has been worked on improving reliability, safety, performance of the large M-type valves. As a result, now valve and connectors are entirely turned from a single steel tube, avoiding assembling and brazing operations - sources of possible defects.

The sales' success for non-return valves has encouraged the extension of the range with new large-types (up to 80 mm), in which have been experienced new solutions to increase sealing at low pressure closure and to reduce dynamic beat phenomena providing to a better cushioning and damping of the stop device.

At last, the new range of IRD products suitable for CO₂ trans critical-cycles, has been engaged the technical staff to become more rigorous in monitoring leaks and increase the burst tests.

All products in all available diameters will be displayed to the next World Trade Fair in which Refrigeria is an active supporter and specially:

Mostra Convegno EXPOCOMFORT - Italia.

CHILLVENTA - Deutschland.

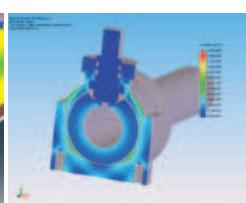

AHR EXPO - USA and Mexico.

CholodEXPO - Rossija.

CRC China
Retail Conference & Exposition Shanghai - China.

Ball Valves FOR TURBOCOR™ COMPRESSORS

ITALY I compressori Danfoss™ della serie Turbocor™ posseggono un grado di efficienza dal 33% al 50% maggiore rispetto ai vite tradizionali.

Le valvole Refrigerat™ per compressori, sono state progettate appositamente per adattarsi alle performance di questa nuova tecnologia e favorirne l'alta efficienza.

Grazie alla grande esperienza maturata negli impianti di condizionamento, IRD ha assemblato questa valvola a passaggio pieno di 75mm, sperimentando una nuova soluzione per garantire il corretto allineamento della flangia e la perfetta tenuta.

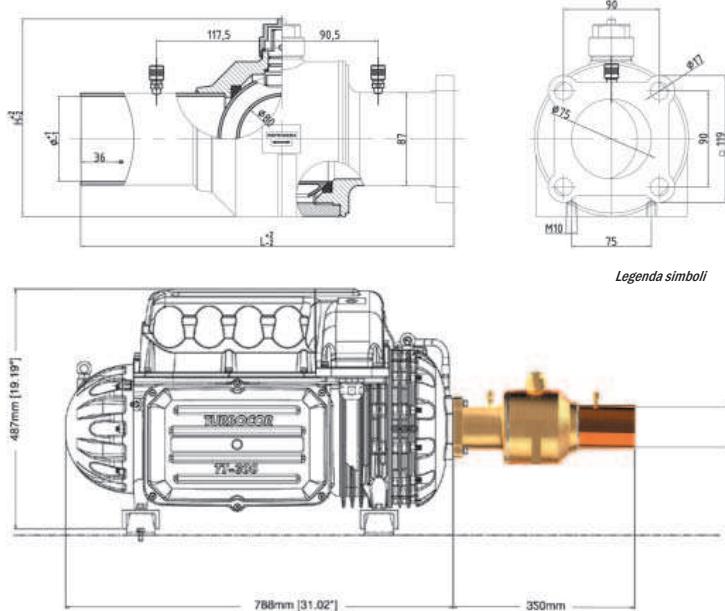

Le valvole sono predisposte per essere manovrate a distanza tramite attuatore elettrico Refrigerat™, fornito a parte.

UK A Danfoss™ Turbocor™ is 33% to 50% more efficient than other compressor technologies.

Refrigerat™ valve is designed to follow the exceptional compressor performance and to support its high efficiency.

Thanks to the great experience in HVAC Systems, IRD developed this 75mm full port ball valve in which have been experienced new solution to assure perfect alignment and complete seal closing.

As an option, the valve is ready to be remote manouvered by Refrigerat™ Actuator, sold separately.

*: ON REQUEST ALL TYPES ARE AVAILABLE IN THE FOLLOWING SETTING PRESSURES: from 0,5 BAR up to 60 BAR

3Way Changeover Valves

Valvole Deviatrici a 3 Vie 3Way Changeover Valves

IT La valvola deviatrice è un rubinetto di servizio tra due valvole di sicurezza che esclude alternativamente l'una o l'altra permettendo interventi sull'impianto. Il rubinetto assicura una caduta di pressione compatibile con il funzionamento dei dispositivi di sicurezza in condizioni di esercizio sia di vapore saturo che di vapore surriscaldato.

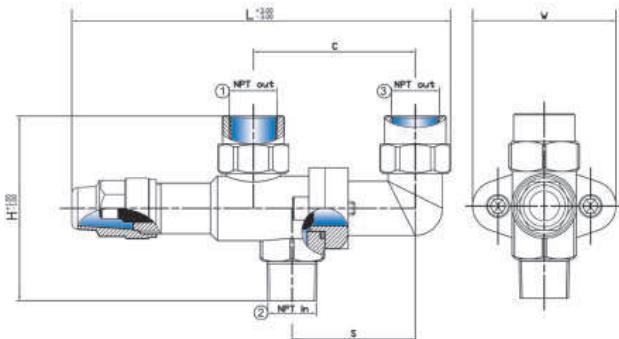

EN The changeover is a service device for safety valves that allows using one valve while isolating the other from the system. The valve ensures a pressure drop compatible with the safety valve operation under condition of discharge of saturated or overheated vapour.

DE Der Hahn wurde so entworfen, dass beide Sicherheitsventile niemals gleichzeitig ausgeschlossen werden können. Der Hahn gewährleistet einen

Druckabfall, der mit der Funktion der Sicherheitseinrichtung bei Ablassen sowohl von gesättigtem als auch von überheiztem Dampf, völlig kompatibel ist.

FR La vanne d'échange a la tâche de vanne de service pour un couple de soupapes de sécurité en permettant simultanément l'utilisation de l'une et l'exclusion de l'autre. La vanne assure une chute de pression parfaitement compatible avec le fonctionnement du dispositif de sécurité en conditions d'évacuation aussi bien de la vapeur saturée que de la vapeur surchauffée.

TR Geçiş özelliği, ikili emniyet vanasında bir vana sisteme kullanılırken, diğerini tamamen sistemden izole eder. Vana, doymus yada aşırı isınmış buharın sistemden atılması sırasında emniyet vanasına uygun bir basınç düşümü sağlar.

1" Rotalock Valves

Valvole Rotalock 1"

■ Interamente realizzate in ottone, le valvole REFRIGERA hanno la peculiare caratteristica di essere provviste di tronchetti a saldare in rame e perno in acciaio INOX, permettendo, da un lato, il perfetto accoppiamento mediante brasatura a cannello con le consuete leghe rame fosforo e garantendo, dall'altro, l'inalterabilità nel tempo di tutte le parti.

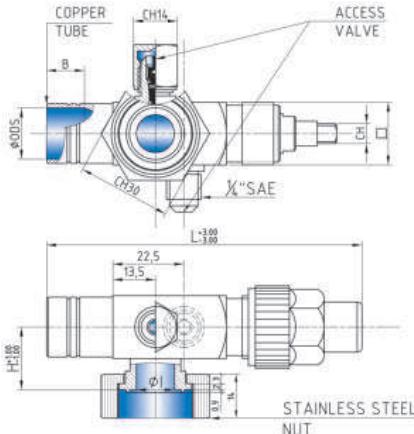

■ Completely made of brass, REFRIGERA valves have the peculiar value to be provided with copper tube and INOX rod that assure easy torch-brazing with the normal filter metals for Cu to Cu joint and, on the other hand, corrosion resistance of all parts.

■ Total aus Messing, die REFRIGERA Rotalockventile haben die besondere Eigenschaft dass die Loestzuezen aus Kupfer und Spindel aus Edelstahl sind. Ausserdem sind die Rotalock Muttern bis 1-1/4" aus Edelstahl. Insgesamt stellen

unsere Rotalockventile ein ganz neuen Konzept dar. Erlauben eine einfache und schnelle Loetung Eigenschaft (Kupfer - Phosphor Loetmittel statt Silberloet) und gleichzeitig garantieren wir eine langlebige Loetverbundung.

■ Entièrement réalisées en laiton, les rotalock REFRIGERA ont la caractéristique d'être pourvues des connections à souder en cuivre avec le pivot en INOX. Grâce à cette particularité, d'une partie, la brasure avec les habituels alliages (pour la jonction Cu-Cu) est plus rapide et facile, de l'autre partie, le type de matériel préserve la vanne des éventuels problèmes de corrosion.

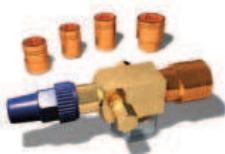

■ Tamamen pirinç dökümünden yapılan REFRIGERA vanalarının bağlantılarının INOX veya pirinç olması, ve diğer tarafının bakır olması bakır veya diğer alaşım türlerine kaynak yapılması kolaylaştırır. Aynı zamanda bu malzemeler koroziyona karşı dayanıklıdır.

Indicatori di Liquido/Umidità

Moisture/Liquid Indicators

Moisture/Liquid Indicators

Italiano Gli indicatori Refrigerera, realizzati con una spia in vetro fusa direttamente nella ghiera metallica, sono costituiti da un elemento sensibile a forma di anello il cui colore indica il valore di umidità sulla linea pari a:

English Refrigerera Indicators, manufactured with the glass lens fused into the metallic ring, consist of a sensitive element as a ring, which changes color according to the percentage of moisture in the system. In detail:

Alemão Die Schauglasreder Refrigerera. Das Schauglas ist direkt in dem metallischen Ring eingepresst. Mit einem empfindlichen Feuchtigkeissindikator wird der Feuchtigkeitsgehalt im Kaeltekreislauf farblich angezeigt.

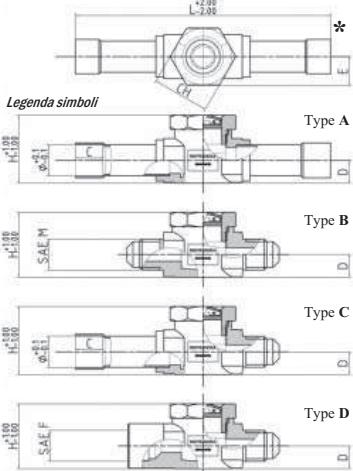

Français Les voyants Refrigerera sont réalisés avec un témoin de verre fondu directement dans le collier métallique. Ils sont constitués d'un élément sensible en forme d'anneau dont la couleur permet une vérification rapide de la présence d'humidité sur la ligne, voir le tableau:

Turkish Refrigerera göstergeleri, metal halkanın içine kaynatılmış cam mercek ile üretilmiş olup, sisteme nemin miktarına göre renk değiştiren hassas bir halka içerir.

Filtri Disidratatori

Filter Driers

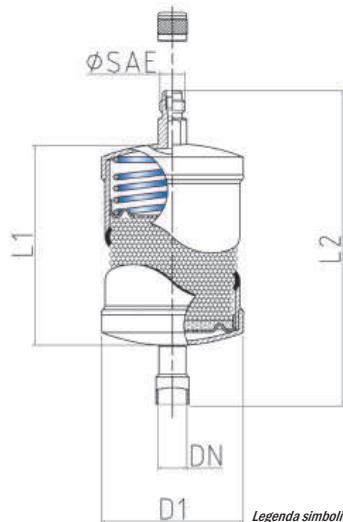

Filter Driers

IT I filtri in acciaio REFRIGERA possiedono la peculiarità della costruzione a sfere dei setacci molecolari, ciò mette a contatto il fluido refrigerante con la massima superficie filtrante possibile per garantire un assorbimento omogeneo delle salamoie acide e una maggior durata rispetto ai filtri a cartuccia solida. Rispetto al gel di silice e all'allumina attiva, inoltre, i setacci molecolari posseggono una maggiore capacità di assorbimento dell'acqua pur garantendo minori perdite di carico. Viene garantito il filtraggio completo di particelle sino a 10 micron.

EN Completely made of steel, REFRIGERA driers have the peculiar value to be provided with a spherical shaped molecular sieve, so mixture and acids are absorbed as much as its volume homogeneously. However, in cartridge shape filters, particles are held on the surface and so it becomes useless in short period. We guarantee higher acid and water absorption than silica-gel and activated alumina and absorption of dirt particles more than size of 10 microns by the filtration grade, keeping however a minimum flow resistance.

DE Die Filtertrocknergehäuse bestehen aus Stahl. Das Molekularsieb ermöglicht eine effektive Schmutzfilterung von Partikeln bis 10 µm. Der Filterwerkstoff eignet sich besonders gut zur Aufnahme von Feuchtigkeit und Säure, bedingt durch die optimierte Oberfläche. Weitere Vorteile sind gute Wasserabsorption und kleine Druckverluste.

TR Tamamen çelikten yapılmış olan REFRIGERA drayelerin içindeki küresel "molecular sieve"ler drayer hacmi kadar nem ve asit homojen olarak emer. Kartuş şeklindeki filtrelerde ise partiküller yüzeyde birbirir ve kısa zamanda işlevini kaybeder. Bütün silika-gel'e oranla daha yüksek asit ve su emisyonu, ve 10 mikrondan büyük bir partiküllerin emilisini ve aynı zamanda minimum akım direncini garantili ediyoruz.

FOR USE WITH CFC-HCFC MINERAL OIL AND POE

Carbon Dioxide Molecule

"To prevent environmental threats many researchers and manufacturers reconsider natural refrigerants"

R744-CO₂

The use of CO₂ as a refrigerant dates back more than a century, but it fell out of favor in the air-conditioning and refrigeration industry with the development of chlorofluorocarbons (CFCs) in the 1930s. However, in the 1980s, scientists identified harming the ozone layer and global warming as major environmental threats, and leading many researchers and manufacturers to reconsider "natural" refrigerants such as CO₂, because these substances have negligible direct global-warming impact and ozone-depletion potential.

Advantages of CO₂ as a refrigerant:

A stable substance

Minimal environmental impact

- Ozone depletion potential = 0

- Global warming potential = 1

Non flammable and non toxic

Compatible with system materials and lubricants

High cooling capacity

- e.g. up to 6 times the capacity of R404A

- Smaller compressor displacement and smaller pipe sizes

High heat transfer

- Smaller evaporators and condensers are possible

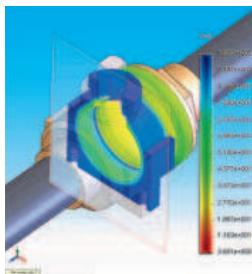

Low viscosity

- Less pipe work pressure drop

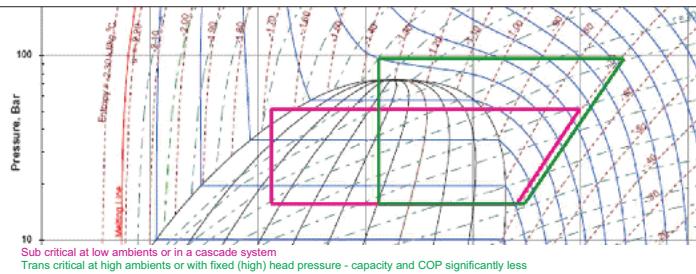

Less sensitive to pipe work pressure drops

New concepts of high-side pressure control in what came to be called a "transcritical" cycle were devised in early patent applications by Gustav Lorentzen, professor at Norwegian University of Science and Technology and his co-workers from 2003 and later in commercial refrigeration systems. The pressure level in these system will be quite high (around 30-130 bar).

Nevertheless smaller volumes, the stored explosion energy in CO₂ piping and components is not much different from a conventional plant.

Testing Results of a CO₂ component

Safety Changeover Device CO₂ suitable

Components CO₂ Suitable

For CO₂ normal cycles, IRD has been designed components able to fit the properties of CO₂ and so used seats and gaskets made of appropriate materials.

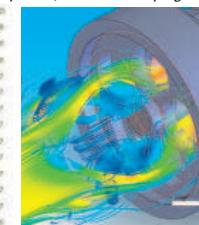

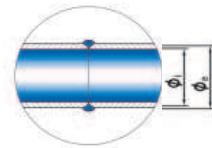

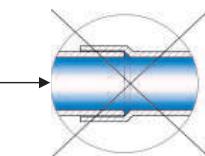

Then, for the range of IRD products suitable for CO₂ transcritical cycles, due to operational pressures certified of up to 100 bars, IRD has been put into action a further effort:

CO₂ -120 bar systems require highly resistant components that have been developed from the company to serial production in a wide range: from ball valves to check valves and from 6mm to 35mm diameters. These valves, that operate under a higher pressure than those of conventional fluorocarbon-based vapor compression systems, have been engaged the technical staff to become more rigorous in monitoring

leaks and increase the burst tests. IRD preferred mounting stainless steel tubes instead of copper connections due to high yield strength and low plastic deformation of the material. On the other side, this kind of tubes have the little inconvenience to force the field personnel to execute butt-welding-joints. IRD is working to assemble alternatively tubes in new high resistance copper alloys.

Valves for CO₂ have internal and external diameters of the connection specified, for butt-weld coupling

R744-CO₂ Ball Valves SMALL SIZE

Valvole a Sfera per R744-CO₂ MISURA PICCOLA

Ball Valves for R744-CO₂ SMALL SIZE

Italiano Il nostro sistema bi-direzionale permette di montare la valvola senza tenere in considerazione la direzione del flusso. Il piccolo foro sulla sfera permette alla valvola di sopportare la pressione del gas senza sollecitare il restante materiale.

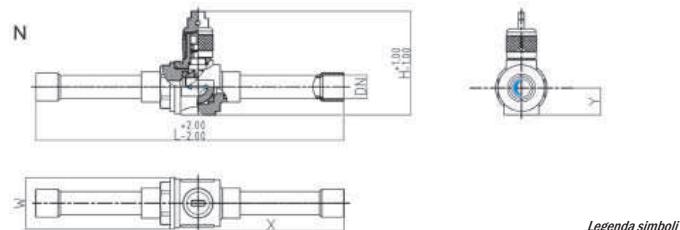

English Our bi-flow system allows the mounting of the valve without taking into consideration the direction of the flow. The small equalization hole on the sphere will allow the valve to support the gas pressure without stressing the other material.

German Unser bi-flow System erlaubt die Ventile zu montieren ohne auf die Richtung (Direktion) des

Durchgangs zu beachten. Das kleine Loch erlaubt einen Druck vom Gas auszuhalten ohne anderes Material zu belasten.

Français Notre système bi - directionnel permet d'installer la vanne sans considérer la direction du flux. Le petit trou permet à la vanne de supporter la pression du gaz utilisée sans fatiguer le matériel restant.

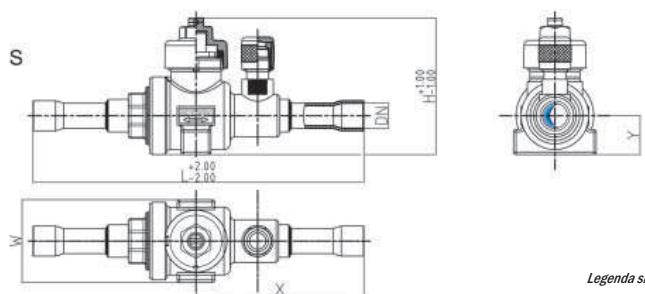

Turkish Çift yönlü sistemimiz sayesinde vanayı akış yönü farketmeksız monte edebilirsiniz. Küre üzerindeki küçük dengeleme deliği sayesinde vana diğer malzemeleri zorlamadan gaz basıncına dayanabilir.

Valvole a Sfera per R744-CO₂ MISURA MEDIA

Ball Valves for R744-CO₂ MEDIUM SIZE

R744-CO₂ Ball Valves MEDIUM SIZE

Il nostro sistema bi-direzionale permette di montare la valvola senza tenere in considerazione la direzione del flusso. Sono disponibili anche con la valvolina di precarica (fornita già stampata fino a 3/4").

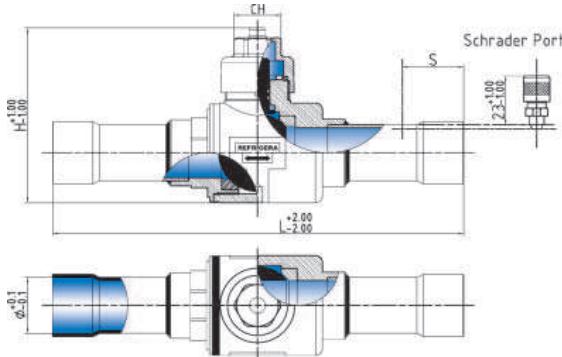

Our bi-flow system allows the mounting of the valve without taking into consideration the direction of the flow. Valves with access port are available (up to 3/4" schrader is pre-forged).

Unser bi-flow System erlaubt die Ventile zu montieren ohne auf die Richtung (Direktion) des Durchgangs zu

beachten. Zur Verfuegung auch mit Schraderventil (Bis 3/4" sind die Schrader Ventilen Vorgepresst).

Notre système bi-directionnel permet d'installer la vanne sans considérer la direction du flux; également à disposition la vanne avec la Schrader sur commande du client (Jusqu'à 3/4" schrader port est faux).

Çift yönlü sistemiz, sayesinde vanayı akış yönü farketmeksız monte edebilirsiniz. Subap girişi vanalar mevcuttur (3/4" e kadar subaplar vana üzerinde sabittir).

R744-CO₂ Rotary-Actuated 2Way Ball Valves

Valvole a 2Vie per R744-CO₂ Motorizzabili

REFRIGERA

R744-CO₂ Rotary-Actuated 2Way Ball Valves

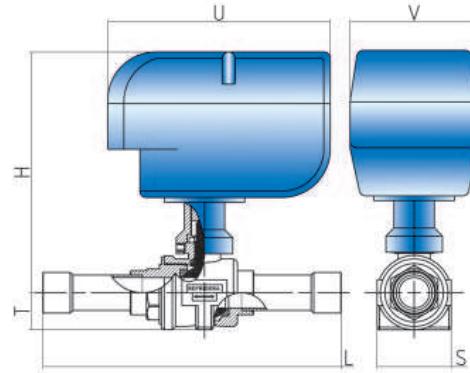

Motorizzazione della valvola a sfera per la versione a 2 vie, particolarmente utilizzabile nei cicli di sbrinamento nelle vetrine frigorifere.

Motorized Valve with actuator for 2-ways valve, especially useful in refrigerators defrosting processes.

**Kugelventilen koennen jetzt auch mit elektrischen Actuator geliefert werden.
Besonders wichtig fuer Abtauprozess der Teken.**

Vanne a boule motorisée soit en version à 2-voies, particulièrement utilisable dans les cycles de dégivrages des vitrines frigorifiques.

**2 ve 3 yolla actuatorlu motorize vanalar
özellikle buzdolabi defrost sistemlerinde
çok kullanışlıdır.**

Valvole di Ritegno per R744-CO₂

R744-CO₂ Check Valves

REFRIGERA

R744-CO₂ Check Valves

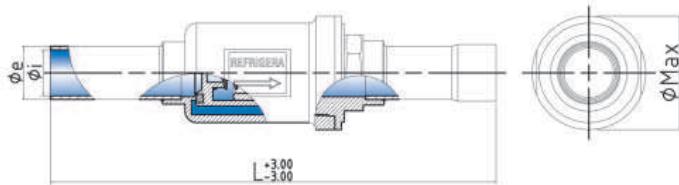

Le nostre valvole di ritegno per CO₂ possono essere montate in qualunque posizione e offrono il migliore fattore di flusso con le minime perdite di carico.

Our CO₂ Check Valves can be mounted in every position and offer the best performance with reduced pressure drops.

Unsere Rueckschlagventile für CO₂ koennen in alles Positionen montiert werden und dieten die beste Leistung mit reduzierten Druckver-

Notre Clapets pour CO₂ peut être monté dans toutes les positions et offrir la meilleure performance avec une baisse de la pression réduite.

Check Valflerimiz her yönde monte edilebilirler ve basınç düşümlerinde en iyi performansı saglarlar.

Applicazione della Direttiva 2002/95/CE. D.L.151-25/07/2005 (G.U.135/L-29/07/2005)

In data 27/01/03 il Parlamento Europeo e il Consiglio dell'Unione Europea hanno sottoscritto per tutti i Paesi aderenti la Direttiva 2002/95/CE anche nota come RoHS, la quale prevede il divieto e la limitazione di utilizzo di piombo (Pb), mercurio (Hg), cadmio (Cd), cromo esavalente (Cr +6) ed alcuni ritardanti di fiamma nelle apparecchiature elettriche ed elettroniche quali Bifenili Polibromurati (PBB) ed Eteri di Difenili Polibromurati (PBDE).

La Direttiva 2002/95/CE, anche nota come WEEE, volta a prevenire e limitare il flusso di rifiuti di apparecchiature destinate alle discariche, attraverso politiche di riuso e riciclaggio degli apparecchi e dei loro componenti. La Direttiva applica il concetto della Responsabilità estesa del produttore (chi inquina paga). Difatti i produttori avranno l'obbligo di provvedere al finanziamento delle operazioni di raccolta, stoccaggio, trasporto, recupero, riciclaggio e corretto smaltimento delle proprie apparecchiature una volta giunte a fine vita. Tale responsabilità finanziaria sarà di tipo individuale per i prodotti immessi sul mercato dopo l'entrata in vigore della Direttiva (13 Agosto 2005) e collettiva per i prodotti immessi prima di tale data.

Nell'allegato della stessa Direttiva sono ammesse deroghe al divieto d'uso delle suddette sostanze pericolose e tra queste sono di interesse del settore della refrigerazione e del condizionamento sono riportate alcune esenzioni per particolari tipi di applicazioni:

- A2.6 Piombo come elemento di lega nell'acciaio contenente fino allo 0,35% di piombo in peso, alluminio contenente fino allo 0,4% di piombo in peso e leghe di rame contenenti fino al 4% di piombo in peso.
- A2.9 Cromo esavalente come anti-corrosivo nei sistemi di raffreddamento in acciaio al carbonio nei frigoriferi ad assorbimento.

La ditta IRD per recepire queste importanti iniziative a salvaguardia dell'ambiente ha provveduto a:

- Far in modo che il 90% dei materiali di imballaggio sia riciclabile.
- Evitare, per quanto in suo potere, l'uso di Cd, Hg, PBB, PBDE nella produzione già dall'anno 2003.
- Adottare leggi a contenuto di piombo rientrante nei limiti RoHS.
- Limitare l'uso di Cromo Esavalente al trattamento superficiale (zinc-tropicalizzazione), comunque mantenendone il tenore al di sotto dello 0,003% in peso.

IRD garantisce che dal luglio 2006, il 100% dei prodotti sono in accordo con la direttiva RoHS.

RoHS and WEEE Compliance Statement. 2002/95/CE Directive.

On January 27, 2003 the European Parliament and the Council of the European Union authorized Directive 2002/95/EC on the restriction of the use of certain hazardous substances in electrical and electronic equipment. This new Directive, also referred to as RoHS ("ro-has") requires that manufacturers reduce usage of six hazardous substances to minimum acceptable levels by July of 2006.

This Directive will ban the placing on the EU market of new electrical and electronic equipment containing more than agreed levels of Lead (Pb), Cadmium (Cd), Mercury (Hg), Hexavalent chromium (Cr +6), Polybrominated biphenyl (PBB) and Polybrominated diphenyl ether (PBDE) flame retardants (art.4). On the same date, Directive 2002/96/EC or WEEE (waste electrical and electronic equipment) was authorized. This Directive encourages and sets specific criteria for the collection, handling and recycling of electric and electronic waste in particular (art.10):
 Sets requirements for the amount of WEEE collection (separate from households);
 Holds resellers accountable for providing WEEE returns, free of charge;
 Requires WEEE to be treated;
 Requires manufacturers to mark EEE products with the WEEE symbol (trash can with "X").

Both Directives impact the entire electronics industry at every level, from the retail store, to manufacturers, distributors and OEMs, but restrictions shall not apply to applications listed in annex 2 and in particular for HVAC manufacturers:

- A2.6 Lead as an alloying element in steel containing up to 0,35% lead by weight, aluminium containing up to 0,4% lead by weight and as a copper alloy containing up to 4% lead by weight.
- A2.9 Hexavalent chromium as anticorrosion of the carbon steel cooling system in absorption refrigerators.

In any case our strategy to support these environmentally important initiatives include:

- 90% of all IRD packing materials are already recyclable
- IRD products have not included the intentional use of Cd, Hg, PBB, PBDE since 2003.
- Lead in copper alloys products is present within the accepted RoHS limits.
- Hexavalent Chromium in yellow zinc plating treatment not exceeds 0,003% by weight.

So IRD guarantees that since July of 2006, 100% of IRD products are RoHS compliant.

Garanzia

Guarantee • Garantie • Gewährleistung • Garanti

Tutti i nostri prodotti sono garantiti per la durata di 12 mesi contro difetti congeniti dei materiali e/o delle lavorazioni.
Il periodo di garanzia decorre dalla data di consegna al trasportatore o dalla data della bolla doganale.

All our products are 12 months guaranteed against defective materials and/or workmanship.

The guarantee runs from the date in which the goods have been forwarded by the transporter or from the custom certificate (or B/L).

Alle unsere Produkte sind fuer eine Zeit bis 12 Monate gegen Produktions-; Herstellungsfehler garantiert.
Die Garantie-periode beginnt vom Datum der Anlieferung oder Zollschein Datum.

Tous nos produits sont garantis pour 12 mois contre defaut du materiel ou/et de production.

Le periode de garantie part de la date de livraison au transporteur ou de la date du document douanier.

Tüm ürünlerimiz malzeme ve/veya işçilik hatalarına karşı 12 ay garantilidir.
Garanti süresi mal tesliminden veya gümrük tarihinden itibaren geçerlidir.

*Вся наша продукция гарантирована сроком на 12 месяцев рас пространяющаяся на производственные дефекты материала.
Гарантийный срок с момента поставки грузоперевозчику или от даты таможенной накладной.*

GENERAL TERMS OF PURCHASE

1. PRODUCTS

The products object to the Terms of Purchase can be found whether in the Refrigeration Catalogue or in the commercial offers inside it along with the designs and specifications. Specifications such as material, weight, size, capacity, services and other information contained in the catalogue are supplied just as information for the BUYER and they will not be considered compulsory for IRD Iniziative srl. The catalogue does not represent an offer for sale and IRD Iniziative srl exercises the right to change them at its discretion at any time without notice or cease producing or commercializing any product. Such variations, included replacement of material with others reasonably similar, will not be accepted as an objection on the part of the BUYER. The BUYER declares to have had express knowledge of the aforementioned catalogue or as an alternative of the commercial offer enclosed.

2. PRICES AND TERMS OF PAYMENT

The prices are ex-works of IRD Iniziative srl unless a different covenant which has to be expressly stated in the commercial offer or in the purchase order. Duties, taxes and charges are expected to be paid by the BUYER. The possible advance payments on the sales prices are always unproductive and serve to bind the BUYER. The payments are always net at the Seller's address. Therefore, it creates neither a case or innovation of the original loan or damage to the agreement of personal property or change of the disregarded territorial jurisdiction. Delayed payments run, from the expire date, with full rights and without pledging any delay, the corresponding interests to the bank rate of the European Central Bank plus 5,0%. Failure to comply the payment terms or any other contract conditions on the part of the BUYER, entitles IRD Iniziative srl to suspend or delay the exercise of its contractual obligations or rescind the contract with simple notice. The contract resolution involves damage compensation. IRD Iniziative srl is authorized to retain advance payment as penalty in case the BUYER overturns the order.

3. OFFERS AND ORDERS

IRD Iniziative srl is bound to the offer for 30 days from the day of the shipment. IRD Iniziative srl reserves the right to accept or refuse the orders. The BUYER's orders must be addressed in writing or by fax and they will remain irrevocable for the BUYER after two days of the shipment. The orders placed by phone should be subsequently regularized by the BUYER in writing within two days. Such orders or any other supply condition regarding them, are accepted only if they are confirmed in writing by IRD Iniziative srl. If the confirmation contains changes or additions to the order, the contract is concluded unless waived in writing by the BUYER within four days from the day of the confirmation of the shipment. In case the order is rejected, IRD Iniziative srl agrees to communicate the BUYER in writing within two days from the day of the placement of the order and possible advance payments (see "Prices and Terms of Payment") will be reimbursed to the BUYER.

4. DELIVERY

Delivery time runs from the moment the contract is considered concluded and, if necessary, from the moment the elements of the contract are supplied and IRD Iniziative srl is provided with the necessary information and the BUYER has duly paid for the maturities. In all cases, the term of delivery is computed in working days and with reason, adequately extended due to events beyond the control of IRD Iniziative srl, such as strikes, lock-outs, fire, flood, late delivery of parts from suppliers, engine failure or other unforeseen circumstances. A delayed readiness of accessory parts that does not prevent the use of the related manufacture product.

Partial delivery is always admitted. The delivery is intended to be carried out in any case on the business premises of IRD Iniziative srl upon submission of a notice or failing that, upon remission to the Carrier. This even when, for express derogation, the price includes freight. From this moment onwards all the risks on the goods are transferred to the BUYER, and will also be at buyer's risk the charges of unloading, storage and safe keeping, maintenance and insurance. If the BUYER does not remove the goods at the date established in the order, the order will be cancelled after three months of such date.

5. PACKAGING AND SHIPPING

The packing is at the BUYER's expense and it is invoiced at cost price. Deliverables travel at the BUYER's risk even if it was sold free delivered. The insurance is carried out under strict directions of the BUYER and in any case at his expense.

6. WARRANTY

IRD Iniziative srl warrants that the Deliverables will conform with good quality and manufacture, in the sense that they commit themselves to repair or replace as new, in his indisputable judgement, free, in the shortest possible time, the parts that, within the warranty period, could present clear faults of material, manufacture or work which could render them unsuitable to the final use, that is without indemnification for the direct or indirect damages of any kind or reason. The warranty is six (6) months for construction details or repaired parts and twelve (12) months for constructions details or new parts. The parts to be repaired or supplied as new should be returned on the IRD Iniziative srl premises at care, expense and risk of the BUYER, the repaired ones or supplied as new are delivered free at works for the BUYER.

The replacements remain IRD Iniziative srl's property. The expenses for the disassembly and assembly of the parts to be repaired or supplied as new are at the expense of the BUYER. The BUYER warranty's right expires if he does not object, at least one time, the payment conditions, and if the faults claimed were originated due to the BUYER itself, employees or third parties, such as wrong installation, inexperience with respect to delivery, wrong and abnormal use, overload, bad and wrong maintenance, use of fuel, improper lubricants, repairs, replacements, modifications or any other tampering performed or have performed by the BUYER, without IRD Iniziative srl authorization nor for Acts of God.

All the parts which by nature or use are subjected to normal attrition or inevitable deterioration remain excluded from the warranty. For those parts of the delivery that IRD Iniziative srl could buy from other Companies are exclusively in force, toward the BUYER, the possible warranties established by such companies. Vices and faults must be denounced to the Seller in writing within the time prescribed by law. Damages caused to third parties remain excluded from the warranty, whether they are people or things, from the use to the damages due to lack of cold and lack of advantages derived from cease of production.

7. CLAIMS

The BUYER will inspect the products immediately and with accuracy and attention at the moment of the arrival on their own office and communicate at once to IRD Iniziative srl any shortage, fault or informality. Any damages of transport must be written on the carrier receipt. The notification on the part of the BUYER about the shortage, faults o non conformity of the products must be done in writing and must contain a complete description of the faults, shortage or non compliance, specifying the shipping documents corresponding to the products and the parcels under dispute. After eight (8) days from the product's arrival date on the premises of the BUYER without notifying the shortage or non compliance with the products, these will be considered as definitively accepted from the BUYER. The BUYER will not be able, in any case, suspend or delay the payments, not even in case of objection, claim or controversy.

8. TITLE RETENTION AGREEMENT

According to the possible extended payment envisaged hereby, the BUYER explicitly declares to accept the retention of title on every thing object to the present commission, in favour of IRD Iniziative srl pursuant to and by effect of the articles 1523, 1524 and the followings of the Civil Code. And so, until the BUYER has fully paid, in legal currency, the agreed price, the goods object to the delivery remain property of IRD Iniziative srl. In case of cancellation of the order/s, IRD Iniziative srl can take possession of the goods wherever they are, even united or incorporated in property of the BUYER or a third party, and not being valid for him the legal regime of ownership or property for destination or incorporation, not even by expressed covenant. During the aforementioned period, the BUYER assumes the obligations and responsibility of depository for the goods delivered, and commits to guard and insure against any damage, destruction, loss, etc. The BUYER cannot alienate the goods which are the object hereunder until they are balanced in legal currency, because until such circumstance, they are IRD Iniziative srl's property. In default of payment, even only one, the BUYER is prevented from the benefit of validity and IRD Iniziative srl can ask for the restitution of the deliveries seizing as indemnity the payments already done, except the faculty of claiming the damages suffered. In case of cancellation of the order/s before the delivery due to breach on the part of the BUYER, the possible proportion deposited when ordering is due to the supplier as a penalty in conformity with the art. 1382 of the Civil Code.

9. VALID LAW AND COMPETENT JURISDICTION

The sales under the present conditions are regulated by the Italian Law. In case of controversy the competent jurisdiction is the one in Pordenone.
